I. WAGE AND SALARY EARNERS IN EMPLOYMENT

NOTE. SEE PAGE 3, PARAGRAPHS 11 and 12, CONCERNING THE PENDING REVISION OF SERIES IN THIS SECTION

<u>Table</u>	<u>Page</u>
.. Explanatory notes	2
1. Civilian employees, private and government, and defence forces : Australia, June 1964 to January 1969	4
Wage and salary earners in civilian employment -	
2. Seasonally adjusted : Australia, February 1968 to January 1969	5
3. States and Territories, December 1967 to January 1969	5
4. Industry groups and sub-groups : States, January 1969	6
5. Industry groups and sub-groups : Australia, December 1967 to January 1969	8
6. Government bodies : States and Territories, January 1969	10

II. EMPLOYEES IN LARGER PRIVATE FACTORIES

.. Explanatory notes	10
All industries, and industries excluding food, etc.	
7. States, January 1968 to February 1969	11
8. Industry groups, six States, January 1968 to February 1969	12

III. CIVILIAN WORK FORCE ESTIMATES - SIX STATE CAPITALS

Six State capital cities, civilian population 15 years of age and over -

9. Occupational status, February 1966 to May 1968	13
10. Work force participation and unemployment rates, by age group and marital status, February 1966 to May 1968	14

IV. REGISTERED UNEMPLOYED AND NUMBER ON BENEFIT

11. Persons registered for employment with Commonwealth Employment Service, June 1966 to February 1969	15
12. Persons receiving unemployment benefit, June 1966 to February 1969	16

V. JOB VACANCIES

13. Vacancies registered with Commonwealth Employment Service, June 1966 to February 1969	17
---	----

1. WAGE AND SALARY EARNERS IN EMPLOYMENT

The series contained in this section, except those relating to government employees and defence forces, are based on comprehensive data (referred to herein as "benchmarks") derived for the purpose from the population censuses of June 1954 and June 1961. For the intercensal period 1954-1961 and from July 1961 to date the figures shown are estimates designed to measure month-to-month changes in the sector of employment to which the benchmarks relate. As mentioned below, the series will be revised in the light of the 1966 population census results.

2. Between population censuses the employment data are obtained from three main sources, namely (a) current pay-roll tax returns; (b) current returns from government bodies; and (c) some other direct current records of employment (e.g. for hospitals). The total of recorded employment is supplemented each month by estimates of changes in the number of wage and salary earners not covered by the foregoing collections.

3. The figures in this section, except those in Table 1, relate only to civilian wage and salary earners. They therefore exclude employers, self-employed persons, unpaid helpers and defence forces. Also excluded, because of the inadequacy of current data, are employees in rural industry and in private domestic service.

4. Current data supplied by reporting enterprises or establishments generally refer to persons on the payroll for the last pay-period in each month. Persons who are on paid leave or who work during part of the pay-period and are unemployed or on strike during the rest of the period are generally counted as employed. Those not shown on employers' payrolls because they are on leave without pay, on strike or stood down for the entire period are excluded.

5. Pay-roll tax returns are lodged at present by all employers paying more than \$400 a week in wages (other than certain Commonwealth Government bodies, religious and benevolent institutions, public hospitals and other similar organisations specifically exempted under the Pay-roll Tax Assessment Act 1941-1968).

6. The level of the estimates in this bulletin is affected by the exclusion of many employees from the 1961 census benchmarks (see paragraphs 8 and 9); nevertheless, they measure reasonably well the short-term trends in employment in the defined field. However, they may be less reliable for longer-term measurement. There are conceptual differences between benchmark and payroll data, and changes in such factors as labour turnover, multiple jobholding and part-time working all affect the trend over longer periods.

7. The benchmark figures were derived from particulars recorded for individuals on population census schedules, while the estimated monthly figures are derived mainly from reports supplied by employers, relating to enterprises or establishments. Because the two sources differ in some cases in scope and in the reporting of industry, the industry dissection of the benchmark totals was adjusted to conform as closely as possible to an enterprise/establishment reporting basis. The industry classification used throughout the series is that of the population census of June 1961.

8. At the 1954 and 1961 population censuses those persons who were not stated to be engaged in an industry, business, profession, trade or service were required to be described as students, pensioners, engaged in home duties, etc. and were automatically classified as not being in the work force. It is believed that many persons - particularly married women - classified themselves according to their main or usual activity or status (e.g. home duties) and overlooked the part-time or casual employment that they had at the time of the census. Had the census questions been designed to obtain particulars of each person's actual activity during a specified period (as the 1966 population census work force questions were), so that all employees who did any paid work at all, or who had a job, would have been included, these persons would have been counted in the total of employed wage and salary earners.

9. The scope of the current monthly series is similar to and subject to the same limitations as that of the population census benchmarks. For this reason the totals shown in this section for Australia, for States and Territories, and for industries, do not necessarily represent, at any point of time, the total numbers of wage and salary earners (as defined in paragraph 10) employed full-time or part-time in those areas or industries. Instead, they represent the estimated numbers of persons who would have been counted as wage and salary earners at a population census in which the concepts and definitions were the same as those of the 1961 census.

10. The concepts and definitions adopted at the 1966 population census (see paragraph 8) conformed closely to the recommendations of the Eighth International Conference of Labour Statisticians: all persons who did any paid work for an employer or who had a job as an employee from which they were temporarily absent were therefore classified as employed wage and salary earners. Census figures have been published in a series of bulletins (Nos 1.6, 2.6, etc.) which show particulars of the occupational status and industry of the population in each State and Territory at June 1966. The figures therein for wage and salary earners classified by industry are not comparable with those in Section 1 of this bulletin, because they are based on different work force concepts and definitions and on a different method of allocating persons to industries (see paragraphs 7-9). Furthermore, the figures in Section 1 are still based on June 1961 benchmarks.

11. The table below gives a comparison, at June 1966, of the estimated number of employed wage and salary earners (excluding defence forces and employees in rural industry and private domestic service), compiled on the current basis, and figures from the population census. In adjusting the census figures to exclude the categories of persons excluded from the estimates, allowance has been made for persons whose industry was either inadequately described or not stated.

WAGE AND SALARY EARNERS IN CIVILIAN EMPLOYMENT, JUNE 1966

(Excluding defence forces and employees in rural industry and private domestic service)

(a) Includes persons employed in the Australian Capital Territory who reside in adjoining areas.

(b) Based on 1961 population census benchmarks. See paras. 8 and 9 on page 2. (c) See para. 10 above.

12. A new series of estimates for June 1966 and subsequent months will be published as soon as possible. This series will be based on 1966 census benchmarks and will therefore be at a higher level than the present series (see table above). In due course the estimates for periods prior to the census of June 1966 will be revised, but on a basis comparable with that of the 1961 census benchmarks, the information needed to revise these benchmarks on the 1966 census basis not being available.

13. Particulars of the principal series of estimates of wage and salary earners in employment have also been published in the following special bulletins:

S.B. 412 Wage and Salary Earners in Employment, June 1954 to June 1961

S.B. 295 Wage and Salary Earners in Employment, June 1961 to June 1965

Some of the figures from January 1964 have since been revised. Revised figures for the period January 1964 to June 1965 were published in the June 1966 issue of "Employment and Unemployment". The August 1967 issue of this bulletin contains revised figures for the period July 1965 to July 1967.

14. This bulletin includes seasonally adjusted figures for selected employment series for Australia - see Table 2, page 5. Details of the methods used in seasonally adjusting these and other series are given in "Seasonally Adjusted Indicators 1968" (Ref. No. 1.10), issued on 21 May 1968.

NOTE. Any discrepancies between totals and sums of components in tables are due to rounding.

(a) To be revised; see page 3, paragraphs 11 and 12. (b) Includes employees, within Australia, of government bodies (Commonwealth, State, local and semi-government) on services such as railways, tramways, banks, post office, air transport, education (including universities), broadcasting, television, police, public works, factories and munitions establishments, departmental hospitals and institutions, migrant hostels, etc., as well as administrative employees. (c) Permanent defence forces in Australia and overseas. From July 1965, includes national servicemen enlisted in the Regular Army Supplement. Where the intake occurred at the end of the month, national servicemen have been included in the defence forces figures in the following month. r - revised.

(a) See note (b) to Table 1. Excludes State and Local Government employees (3.2 thousand persons in December 1968) engaged in rural industry, or in private homes as employees of government emergency housekeeper services. Also excludes defence forces (see Table 1 on page 4). (b) Includes semi-government bodies.

11. EMPLOYEES IN LARGER PRIVATE FACTORIES

The employment figures in this section are obtained by means of a survey of larger private factories undertaken by joint arrangement between the Department of Labour and National Service and this Bureau. The survey covers practically all private factories with 100 or more employees and a large section of those with between 50 and 100 employees.

2. The results of the survey give an earlier indication of current monthly trends in private factory employment than is available from any other source, and the trends in employment in these larger private factories are broadly consonant with those shown by the subsequent estimates of total private factory employment. It should be noted, however, that the figures in this section include persons on strike but exclude persons stood down as a result of an industrial dispute. To this extent they differ from the employment estimates in Section I of this bulletin. The latter exclude all persons who, as a result of an industrial dispute, are not shown on employers' payrolls.

3. Employers co-operating in the survey are asked to supply, as at the last pay-day in the month, the number of employees in the factory or on the factory office staff, providing their employment is directly related to manufacture. Selling and distribution staff are excluded.

4. Employment in factories in the industry group "food, drink and tobacco" is subject to considerable seasonal fluctuation. In order to isolate the effect of such seasonal movements, separate figures have been included in this section to show the movement in employment in factories other than food, drink and tobacco factories.

5. In order to keep the survey as representative as possible, the list of factories included is revised at the beginning of each year. When comparing employment figures for different periods it should be noted that at any point of time a continuous monthly series on a uniform basis is available only from January of the previous year.

III. CIVILIAN WORK FORCE - SIX STATE CAPITAL CITIES

NOTE. Estimates of the civilian work force in this section are based on results of a survey of a sample of households. For a description of the survey, and definitions used in the classification of the work force, see pages 15 and 16 of the September 1968 issue of this bulletin. More detailed figures were published in that issue.

A new series of quarterly estimates of the total Australian civilian work force is being prepared and will be published as soon as possible. The present series of estimates for the six State capital cities will therefore not be extended beyond May 1968.

(a) Persons who claimed, when registering with the Commonwealth Employment Service, that they were not employed and who were recorded as unplaced. Includes those referred to employers and those who may have obtained employment without notifying the C.E.S. Includes also persons receiving unemployment benefit (see Table 12).

(b) Generally at Friday nearest end of month. (c) Includes the Australian Capital Territory. (d) Includes the Northern Territory. (e) For details of the methods used in seasonally adjusting these and other series see "Seasonally Adjusted Indicators 1968", issued on 21 May 1968. (f) Affected by earlier school-leaving dates.
